<p>Cardiac Catheterization Lab</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 2</li> <li>▪Patient populations: Cardiology: congenital, transplant, electrophysiology</li> <li>▪Nursing model of care: RNs, cardiovascular technologists, radiology technologists</li> <li>▪Advanced nursing skills: Catheterization, electrophysiology and hybrid procedures</li> </ul>

Healthcare Setting: **Seattle Children's Hospital**

<p>Cardiac Intensive Care Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 16</li> <li>▪Patient populations: Post-operative cardiac surgery, cardiac transplant heart failure, congenital cardiac defects</li> <li>▪Nursing model of care: RNs, CNAs</li> <li>▪Advanced nursing skills: Ventilators, ventricular assist devices, extracorporeal membrane oxygenation (ECMO), transplant, continuous renal replacement therapy</li> </ul> <p><b>CICU</b>-The Cardiac Intensive Care Unit (CICU) cares for newborns up to young adults with acquired and congenital heart disease. The CICU supports robust mechanical circulatory assist and cardiac transplant programs. Specialized care provided in the CICU includes cerebral oximetry monitoring, inhaled nitric oxide, temporary pacemakers, heart failure management, open chest procedures and continuous renal replacement therapy (CRRT). Extracorporeal</p>
<p>Cardiology Clinic</p>	<ul style="list-style-type: none"> <li>▪Number of exam rooms: 10</li> <li>▪Patient populations: Cardiology: acquired, congenital, surgical follow-up, transplant</li> <li>▪Nursing model of care: MDs, RNs, MAs</li> <li>▪Advanced nursing skills: Care coordination</li> </ul>
<p>Care Coordination</p>	<ul style="list-style-type: none"> <li>▪Number of beds: N/A</li> <li>▪Patient populations: All conditions</li> <li>▪Nursing model of care: RNs</li> <li>▪Advanced nursing skills: Case management</li> </ul>
<p>Dialysis</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 7</li> <li>▪Patient populations: Nephrology, dialysis</li> <li>▪Nursing model of care: RNs, CNAs</li> <li>▪Advanced nursing skills: Acute and chronic hemodialysis, peritoneal dialysis</li> </ul>
<p>Emergency Department</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 38</li> <li>▪Patient populations: All conditions</li> <li>▪Nursing model of care: RNs, emergency department technicians, nurse technicians</li> <li>▪Advanced nursing skills: Advanced triage, critical care, resuscitation, IV placement, sedation, procedures</li> </ul> <p><b>ED</b>-The Emergency Department (ED) manages the spectrum of mild to critically ill and injured patients p from birth to age 21. All patients presenting to the ED seeking care receive a Medical Screening Exam (MSE), stabilization, evaluation, and treatment.</p>

Healthcare Setting: **Seattle Children's Hospital**

<p>Endoscopy</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 2</li> <li>▪Patient populations: GI disorders: liver failure/transplant, inflammatory bowel disease, gall bladder issues, motility disorders, ulcerative colitis</li> <li>▪Nursing model of care: RNs</li> <li>▪Advanced nursing skills: Anesthesia support, endoscope operations, circulate procedures, IV placement</li> </ul> <p><b>GI Lab (Endoscopy Lab)</b>- Endoscopy Lab provides diagnostic and therapeutic services for patients utilizing endoscopy and fluoroscopy. Endoscopy Lab nursing staff cover two roles in the lab to circulate and fulfill Endoscopy technologists duties.</p>
<p>Home Care</p>	<ul style="list-style-type: none"> <li>▪Number of beds: N/A</li> <li>▪Patient populations: Hematology/oncology, gastroenterology, transplant, pulmonary, immunology, infectious disease</li> <li>▪Nursing model of care: RNs</li> <li>▪Advanced nursing skills: Central line care, patient and caregiver education</li> </ul>
<p>Interventional Radiology</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 2</li> <li>▪Patient populations: Transplants, complex cardiac, vascular malformation, hematology/oncology, dialysis</li> <li>▪Nursing model of care: RNs, radiology technologists</li> <li>▪Advanced nursing skills: Anesthesia support, circulating procedures, assist with invasive monitoring</li> </ul> <p><b>Interventional Radiology</b>-Radiology provides diagnostic and therapeutic services for patients utilizing digital X-rays (DX), fluoroscopy, magnetic resonance imaging (MRI), computed tomography (CT), ultrasound (US), and invasive interventional radiology. Interventional Radiology Nursing staff coordinate and circulate invasive interventional radiology procedures.</p>
<p>Medical Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 80</li> <li>▪Patient populations: General medicine, endocrinology, pulmonary, neurology, rheumatology, craniofacial, gastroenterology</li> <li>▪Nursing model of care: RNs, CNAs</li> <li>▪Advanced nursing skills: Tracheostomies, ventilators</li> </ul> <p><b>Medical R4</b>-The Medical R4 unit cares for patients, newborn to 21 years from medical specialty services. It is comprised mainly of endocrine, neurology, rheumatology, and gastroenterology service patients.</p> <p><b>Medical F3</b>-The Medical Unit F3 Care for patients from newborn to 21 years of age. It is comprised mainly of pulmonary and cranio-facial service patients. Staff in this area also care for patients with tracheostomies and ventilators.</p>

Healthcare Setting: **Seattle Children's Hospital**

<p>Neonatal Intensive Care Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 27–32</li> <li>▪Patient populations: Prematurity with surgical needs, congenital anomalies, surgical, hypoxic ischemic encephalopathy (HIE), neonatal ENT</li> <li>▪Nursing model of care: RNs</li> <li>▪Advanced nursing skills: Ventilators, extracorporeal membrane oxygenation (ECMO), amplitude integrated electroencephalography (aEEG), external ventricular drainage</li> </ul> <p><b>NICU</b>-The Neonatal Intensive Care Unit is the only Level IV NICU in Washington. Patients in the NICU are neonates up to 50 weeks post-gestational age. Many of the patients have congenital diagnoses requiring specialized pre-operative surgical and postoperative surgical care. Critically ill neonates with complex medical issues are also cared for in this unit. Specialized care provided includes ECMO/ECLS, cooling, in-room surgical procedures, high frequency oscillatory ventilation, use of inhaled nitric oxide, etc. The NICU charge nurse responds to all Code Blue events in the hospital.</p>
<p>Pediatric Intensive Care Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 32</li> <li>▪Patient populations: Medical, endocrinology, pulmonary, neurosurgery, orthopedic, general surgery, transplant, otolaryngology</li> <li>▪Nursing model of care: RNs</li> <li>▪Advanced nursing skills: Ventilators, ICP monitoring, continuous renal replacement therapy (CRRT), external ventricular devices, transplant</li> </ul> <p><b>PICU</b>-The Pediatric Intensive Care Unit (PICU) cares for infants up to young adults with a wide range of clinical conditions. Examples of medical conditions include septic shock, acute and chronic respiratory failure, diabetic ketoacidosis, and metabolic diseases. Patients have a range of surgical and medical services including Neurosurgery, Solid Organ Transplant, Craniofacial/Plastics, Hematology/Oncology and Bone Marrow &amp; Stem Cell Transplant patients. Specialized care provided in the PICU includes cerebral and renal oximetry monitoring, high frequency oscillatory ventilation, use of inhaled nitric oxide, continuous renal replacement therapy (CRRT) and intracranial pressure monitoring. This also includes extracorporeal life support (ECMO), highly specialized cardiopulmonary support.</p>

Healthcare Setting: **Seattle Children's Hospital**

<p>Perioperative Care (Post-Anesthesia Care Unit and Operating Room)</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 34</li> <li>▪Patient populations: Cardiac, craniofacial, dental/oral, general surgery, neurosurgery</li> <li>▪Nursing model of care: RNs, CNAs, surgical technologists, anesthesia technicians</li> <li>▪Advanced nursing skills: ECMO cannulation, robotics, solid organ transplant, lasers</li> </ul> <p style="text-align: right;"><b>PACU – The Post</b></p> <p>Anesthesia Care Unit (PACU) care for patients who are undergoing procedures or surgeries requiring anesthesia. We liaise with all units in the hospital to help coordinate care, as well as patients in the community who come for their same-day procedures. Before their procedure, we ensure the patient and their care-givers understand what to expect and how to be set up for success. After their procedure we are there to assess and intervene on any airway issues, pain or nausea that may result from the procedure. And finally, we are there to help the patient and care-giver understand discharge teaching and post-op care.</p>
<p>Psychiatry and Behavioral Medicine Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 41</li> <li>▪Patient populations: Depression, eating disorders, anxiety</li> <li>▪Nursing model of care: RNs, pediatric mental health specialists</li> <li>▪Advanced nursing skills: Nasogastric tubes, behavior management, wound care, diabetes</li> </ul> <p style="text-align: right;"><b>PBMU-The</b></p> <p>Psychiatric and Behavioral Medicine Unit (PBMU) is involved in the evaluation and behavioral stabilization of children (ages 4 through 17) with emotional, behavioral, and neuropsychiatric disorders. Depression, developmental delays, attention deficits, anxiety, pervasive developmental disorders, conduct disorders, oppositional-defiant disorders, anorexia/bulimia, and psychosis are among the disorders commonly diagnosed. The unit is also invested in treating children with unique concomitant problems such as hearing impairments, chronic medical illnesses, or physical developmental disabilities.</p> <p>The PBMU program utilizes a model of care that emphasizes an interdisciplinary approach. Registered nurses, child and adolescent psychiatrists, psychiatric nurse practitioners, psychologists, mental health therapists, social workers, pediatric mental health specialists (PMHS), special education teachers, occupational, recreational, art, music, and speech therapists, and students from these various disciplines participate in the development of individualized treatment plans. Care includes the provision of behavior management in a milieu setting; parent and patient education; group activities; supportive family and individual support; psychotropic medication management and limited medical nursing services.</p>

Healthcare Setting: **Seattle Children's Hospital**

<p>Radiology Recovery</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 7</li> <li>▪Patient populations: Sedation, anesthesia or nursing support for diagnostic exams</li> <li>▪Nursing model of care: RNs, radiology technologists</li> <li>▪Advanced nursing skills: Anesthesia support (induction), monitoring for minimal and moderate sedation, recovery of sedated and anesthetized patients, IV placement</li> </ul> <p>Radiology provides diagnostic and therapeutic services for patients utilizing digital X-rays (DX), fluoroscopy, magnetic resonance imaging (MRI), computed tomography (CT), nuclear medicine (NM), DEXA, ultrasound (US), and invasive interventional radiology. Radiology Nursing staff provides care to patients during induction and recovery care for patients requiring general anesthesia.</p> <p style="text-align: right;"><b>Radiology Recovery-</b></p>
<p>Rehabilitation Unit</p>	<ul style="list-style-type: none"> <li>▪Number of beds: 12</li> <li>▪Patient populations: Traumatic brain injury, spinal cord injury, poly-trauma, cerebral palsy post-op, stroke</li> <li>▪Nursing model of care: RNs, LPNs, CNAs</li> <li>▪Advanced nursing skills: Ventilators (trach/vent, trach/bi-pap), autonomic dysreflexia (AD)</li> </ul> <p>Rehabilitation Unit provides inpatient evaluation and care of children up to 21 years of age with disabilities due to illness, injury or congenital causes. Additionally, they may care for general surgery and general medical patients. Collaborating with a cross disciplinary team, care is provided to children with traumatic brain injury, spinal cord trauma, burns, and neurological disorders as well as physical or cognitive disabilities. Staff on this unit care for patients with tracheostomies and ventilators. The Rehab unit helps to organize the family's experience and prepare them for the transition back to their home and community.</p> <p style="text-align: right;">Rehab-The</p>
<p>Research</p>	<ul style="list-style-type: none"> <li>▪Number of clinic rooms: 10</li> <li>▪Patient populations: Oncology, endocrinology, pulmonology, allergy, infectious disease</li> <li>▪Nursing model of care: RNs, MAs</li> <li>▪Advanced nursing skills: Perform research procedures, phlebotomy, IV placement, port access, anaphylaxis management</li> </ul>

Healthcare Setting: **Seattle Children's Hospital**

Surgical Unit	<ul style="list-style-type: none"> <li>▪Number of beds: 80</li> <li>▪Patient populations: Over 30 surgical specialties, including neuro, orthopedic, cardiac, transplant and nephrology</li> <li>▪Nursing model of care: RNs, LPNs, CNAs</li> <li>▪Advanced nursing skills: Ventricular assist devices (VADs), ventriculostomy, peritoneal dialysis, external pacemakers</li> </ul> <p><b>Surgical RC5</b>-The Surgical Unit RC5 cares for infants to young adults covered by mostly surgical specialties and some medical specialties. This unit's patient population is comprised mainly of General Surgery, Orthopedics, Urology, Neurosurgery, Neurology, Plastics, Craniofacial, and Ear Nose and Throat and Otolaryngology service patients. Staff in this area care for patients with external ventriculostomies, seizure monitoring needs, halo-gravity traction devices, and fresh spinal fusions; they receive additional training to support this care.</p> <p><b>Surgical RC6</b>-The Surgical RC6 cares for patients from infant to young adult. Patient population includes Cardiology, Cardiac Surgery, Solid Organ Failure and Transplant, Dialysis, Neonatology. Many of the patients begin care in the Cardiac ICU and then transfer to Surgical RC6 to continue care and move towards discharge.</p>
Transplant	<ul style="list-style-type: none"> <li>▪Number of beds: N/A</li> <li>▪Patient populations: Abdominal transplants (liver, kidney, intestine)</li> <li>▪Nursing model of care: RN transplant coordinators</li> <li>▪Advanced nursing skills: Care coordination</li> </ul>
Urgent Care	<ul style="list-style-type: none"> <li>▪Number of beds: 7–10</li> <li>▪Patient populations: Acute pediatric illnesses and injury</li> <li>▪Nursing model of care: RNs, nurse technologists</li> <li>▪Advanced nursing skills: Triage, IV placement, sedation, procedures</li> </ul>
